

EVOLVE IP'S HITRUST CERTIFICATION

The HITRUST CSF is the healthcare industry's leading security control framework. Evolve IP's certification provides assurance that we maintain, transmit, and manage PHI in a secure and continuously improving environment.

More than 90 organizations currently require their business associates to be HITRUST CSF certified to ensure they can safely handle PHI.

DID YOU KNOW?

- 5 major healthcare payers require their business associates to comply with the HITRUST CSF
- Evolve IP's cloud infrastructure can help enable and accelerate customers' path to HITRUST certification - reducing the burden by 60-70%
- HITRUST is the most widely adopted security framework in the healthcare industry
- HITRUST certification requires commitment to a culture of security

The HITRUST Common Security Framework (CSF) was developed by leading healthcare and IT professionals. The CSF leverages multiple standards to provide an efficient and prescriptive framework for ensuring compliance with HIPAA. This framework harmonizes and cross-references over 20 globally-recognized standards, including: HIPAA, HITECH, NIST, ISO, PCI, FTC, COBIT, Sarbanes-Oxley, Europe's GDPR, and various state regulations.

Communications and Computing Security

HITRUST has certified our Evolve Cloud East (Philadelphia, PA) and Evolve Cloud West (Las Vegas, NV) infrastructure, confirming that we provide our cloud computing and cloud communications services in a secure and reliable environment. Certification also acknowledges that Evolve IP adheres to the highest security standards for electronic protected health information (PHI).

Here's why it matters to our clients:

1. HITRUST certification illustrates a commitment to compliance and security

3rd party auditors have confirmed that Evolve IP's system of continuous review and improvement effectively protects against emerging threats and cyberattacks. This certification is far superior to the commonly known SOC II and SOC III reports.

2. HITRUST is respected across the healthcare industry

HITRUST is the most widely used security framework in the US healthcare industry and has been adopted by 83% of hospitals and healthcare providers.

3. Many business associates are required to get HITRUST certified: Evolve IP can help

As a provider of solutions and infrastructure, Evolve IP is able to provide world-class services that are compatible with your HITRUST standards, or can help streamline the process of attaining your own HITRUST certification by up to 70%.
